Surface-to-Air Missile Assembly Plants in the Moscow Area (S)

During a recent flight by commercial air from Leningrad to Moscow, the ARMA, Moscow, confirmed three (3) previously reported surface-to-air missile launching sites north of Moscow and photographed a new missile assembly plant northwest of Marfino.

COMMENT: The existence of four (4) missile assembly plants has now been established in the Moscow area (See DIB - 18 July 1956) and one other site is held as a probable assembly plant (See chart). Although the assembly plants are oriented on the inner missile ring, there have not been sufficient sightings made to establish a definite pattern throughout the missile complex.
